Search for Videos

NoteBurner YouTube Video Downloader applies with a new type of searching mechanism, which will enable users to add videos by **copying & pasting the link from YouTube**.

Advanced Download

The program will list all downloads option in the "Advanced Download" window, it's allowing you to select the corresponding video or audio in different output format & quality.

If you want to download a video, you need to choose Download as Video in the bottom left corner. Also, you can select the audio and subtitle options in their corresponding columns. If you want to download an audio file, you can choose Download as Audio. You cannot select options in the Video and Subtitle columns. NoteBunrer also allows you to download subtitles as separate files. To do that, simply choose Download as Subtitles.

Tips about the Video Quality and Format

Video Quality: NoteBurner YouTube Video Downloader can grab videos up to 8K (4320P) in quality. Of course, the quality option is dependent on that of the original uploaded video. If the video was recorded and uploaded in standard definition, it won't be available to download in high definition. And please note that, larger resolution videos will dramatically increase file size and then extend the download time.

Format: The most common format of YouTube video is MP4 with AAC audio codec. NoteBurner definitely supports downloading the video in MP4 format and extracting audio in AAC format. Plus, video format "MKV" and audio format "WebM" are both supported.

Start Downloading Video

After completing the above steps, now the final step is clicking the download icon to start downloading the video to the output folder you've chosen in the previous step.
